

# Z Fleet Navigator

## Your online fleet analysis tool

Keeping accident costs under control, tracking trends and assessing potential risks are all critical elements in maintaining an efficient and viable motor fleet.

Z Fleet Navigator is unique to Zurich fleet customers. This powerful and secure web-based claims reporting and analysis tool is part of Zurich's Z Track system.

Z Fleet Navigator revolutionises the way customers manage their fleet's risks and helps keep their fleet on the road. Powerful reports will enable monitoring, measuring, reviewing and reporting on many areas of a fleet's performance – clearly and efficiently.

Fleet customers benefit from best-practice risk management.

### Benefits

- Operational savings through better risk management controls
- Time savings through specific and timely online reporting
- A wide range of standard reports, as well as the ability to download data to allow you to complete your own tailored reports

### Features

- View your seven-year motor claims history online at any time
- Analyse, review and create accident reports (in Word, Excel or pdf formats)
- Identify trends, opportunities and problem areas within your motor fleet
- Monitor claims performance at a divisional level
- Ask our expert motor fleet Risk Engineers to assist with data interpretation and intervention programs

### Z Fleet Navigator reporting tools

Z Fleet Navigator offers you 35 reports grouped into five categories to assist in analysing your fleet and its performance.

**Summary reports:** Provides the big picture of claims trends and will assist in identifying gaps and where to focus to minimise fleet risks.

**Incident type reports:** Analyses claims data by accident type and also helps to identify problem areas and create potential corrective measures.

**Incident distribution reports:** Establishes trends and identifies problem areas by analysing claims data by time, date and location of incidents.

**Detailed reports:** Provides rich data to report on individual claims by criteria that you can specify, and is helpful in reviewing performance by division or driver.

**Benchmark reports:** Analytics to compare your fleet on a de-identified and aggregated basis.

## Report formats

It is simple to save and produce print-ready reports and to export data for merging with other databases (e.g. your own OH&S loss reports or under excess loss reports). This allows you to tailor data on your individual fleet in Excel and merge it with other documents, such as Microsoft Powerpoint presentations and Word reports.

Data are shown in tables and graphically, making trends and patterns stand out. You can zoom in on the screen for more detail and select a slice in time.

## Zurich's strength in fleet

Zurich is recognised as a global leader in motor fleet insurance across a wide range of vehicle classes. We are successful in fleet due to our comprehensive, innovative and leading-edge range of insurance solutions, strong risk management capabilities and our experienced and specialised risk engineers, underwriters and claims staff.
