

# Marine risk solutions

## International expertise, exceptional insights

**With our global expertise in managing marine risks, we help businesses keep their cargo safe and supply chains flowing.**

Our cutting-edge Centres of Practice can provide data, tools and insights to help businesses manage new risks, at every point of the supply chain.

### **New opportunities, new risks**

As increasing globalization opens new markets and new opportunities, it also creates more complex supply chains, exposing businesses to new risks.

And, as the 2020 pandemic has shown, those supply chains can be vulnerable to sudden, unexpected interruptions, causing damage to customer relationships and brand reputation.

The safe delivery of goods can also be impacted by theft, fraud and smuggling, which are on the rise globally.

When you add in the perennial threat of natural hazards and fire, the importance of marine Risk Engineering becomes abundantly clear.

### **Protecting businesses from risks great and small**

We can provide your business with the industry-specific information and data-led insights it needs to correctly identify and mitigate risks big and small, at every stage of your global supply chain. With their expert knowledge of local laws, our Risk Engineering team can provide tailored advice and solutions to protect your cargo against international and domestic exposures.

How we've supported our customers: A couple of real-world examples

- **Risk Management Support:** Zurich has helped various customers translate their losses to financial and other negative impacts, prior to proposing concrete practical solutions and improvement
- **Supply Chain Security:** In close cooperation between Zurich and operational departments of customers supply chains security risks in existing and emerging market are identified, stakeholders awareness has increased and risk based measurements are implemented to contribute to the achievement of the company's strategy
- **Customer wins:** The improvements implemented by Risk Engineering have contributed significantly to multiple customer wins or renewals, e.g. various project cargo shipments

**Our areas of expertise:**

- Global logistics, transport and supply chains
- Global, practical experience with all types of cargo and sizes
- Technical details for shipping anything from A to B
- Global network of specialists providing solutions

## How we reduce risk and increase insight

Here are a few highlighted services revealing how we work with customers to increase data-led marine insight and help reduce risk.

What we do	How our customers benefit
Deep-dive loss reviews to pinpoint where challenges are in the supply chain process	Less financial loss in the supply chain
Share expertise and knowledge with customers' operational team, as a sparring partner	Improved customer satisfaction
Create best practice documents for the general public, based on the areas of expertise that we have in-house/access to	Cost reduction due to less deviations and/or process improvements
Use facts and figures (\$\$\$) to show the value of the impact and potential improvements	Increased knowledge on potential challenges and solutions
